BRAVIA Professional Displays

2021 Model Catalog

logitech

Outstanding picture quality & detailed reproduction for business

Harness the power of rich media content for your organization with BRAVIA Professional Displays.

androidtv

Cognitive Processor XR™

World's first processor with Cognitive Intelligence

Our BRAVIA XR Display takes vision and sound to the next level with the ingenious Cognitive Processor XR. It understands how humans see and hear, providing a whole new experience that immerses you completely in the scene.

4K HDR Processor X1™

One chip, incredibly real

With Object-based HDR remaster and 4K HDR technology, our new 4K HDR Processor X1 reproduces more depth, textures and natural colors than Sony's entry level 4K Processor X1. You'll see pure colors at higher brightness levels for exceptionally realistic pictures.

Cognitive Processor XR™

XR Color

A wide palette of naturally beautiful colors

See colors that are natural and beautiful to the human eye. The Cognitive Processor XR enables our unique display to access a wider palette and reproduce each color with the subtle differences seen in the real world. With extended hue and saturation, vivid shades and realistic texture can be seen.

XR ☑K Upscaling

XR Clarity

Recreating lost texture, the intelligent way

Whatever the content or source, you'll clearly see them close to 4K resolution

with XR 4K Upscaling. Our Cognitive Processor XR accesses a vast amount of

data, intelligently recreating lost textures and detail for real world pictures.

Intelligent motion processing for fast-moving, blur-free scenes

Watching fast-moving movies just got a whole lot better. Our Cognitive Processor XR with XR Motion ClarityTM cross analyses data to ensure action stays smooth, bright and clear with no blur.

XR Contrast

Real life depth with deep blacks and intense brightness

Feel breathtaking contrast, just as in real life. Our Cognitive Processor XR cross analyzes data, enhancing pictures in the same way that the human eye focuses for real life color and depth. With XR Contrast Booster, bright areas are brighter and dark areas darker -eliminating details overwhelmed by shadow or lost in blown-out highlights.

4K HDR Processor X1™

Picture

Unique 4K X-Reality PRO picture processing technology upscales every pixel for remarkable clarity. Advanced noise reduction techniques and a special pattern database ensure every scene is full of lifelike detail.

Contrast

Imagine seeing a white object in a dark environment on your display: on an edge-lit or direct-lit display, you would sacrifice the brightness of the object for a darker background (or vice versa), and the background would likely appear blue or grey. On a Sony Full Array LED display with local dimming, you get a beautiful, natural picture with crisp brightness and an authentically dark background.

X1

Conventional TV

Color

By widening the color spectrum, TRILUMINOS powered by our X1 processors reproduces more colors than a conventional display. It analyzes and processes data in every image to make colors even more natural and precise so pictures are closer than ever to real life.

Clarity

On some screens, sports and fast-action scenes can seem to go by in a blur. Our latest X-Motion Clarity $^{\text{TM}}$ technology keeps everything smooth, bright, and clear. Each "blink" is individually controlled and its duration optimized, while brightness is boosted when needed, so you won't miss a thing.

Expanding the possibility of your business with the new lineup of BRAVIA Professional Displays

Newly added 100" & 32" size broaden the lineup to match to any installation locations. The new Standard product line brings a wide options for business application environment.

Sony's largest professional display model with supreme picture quality features

100"

The new 100" BZ40J delivers supreme picture quality, high contrast, and more detail for large-sized digital signage and meeting rooms.

Features for Professional Use

Professional Mode

New professional features let you disable input or remote control, remove labels and block buttons; customize and store display settings and features, add security then copy them easily from display to display via USB flash memory.

Flexible Content Layout with HTML5

The BZ Series offers built-in support for the HTML5 application platform, so it's possible to use HTML5 interactive signage content without requiring a set-top box or PC. The content screen can be freely laid out using the 4K video, pictures, or even with the HDMI input.

Small, high picture quality 32" 4K display model

NEW

32"

Small in size, but big in picture quality for meeting contents details even in huddle space environment with new 32" BZ30J

Professional Design

Sutable designs for professional use such as Digital Signage

Logo Position for Public Installation

Sony logo is printed to top-right side bezel for public installation such as digital signage and it eliminates the sideways logo in portrait orientation.

Four-sided Uniform Bezel for Portrait Installation * for BZ40J only * for BZ40J only

Cable Management

Neatly bundles the power cable, HDMI and other cables with a cable clamper

32" AC Adapter Holder

Smart installation by adapter holder even in limited space

* for BZ30J only

IP Network and Serial Communication Controls

The BZ Series is controllable both via IP network (wired/wireless LAN) and RS-232C. This makes it possible to incorporate the displays into a variety of existing systems, such as in offices and as eye-catching signage.

Wi-Fi 5Ghz / Apple AirPlay & Chromecast built-in™

Discover a new world of possibilities with the new BRAVIA functionality. Easily mirror content onto your BRAVIA Pro Display using Apple AirPlay or Chromecast built-in, and take advantage of Wi-Fi 5Gz connection.

Cognitive Processor XR™

The BZ40J incorporates the Cognitive Processor XR that uses human perspective analysis to cross analyze thousands of elements at one to create an intensely immersive picture.

XR Trilluminos Pro

Powered by our Cognitive Processor XR, this display reproduces color it in a way that humans find beautiful. See a wider palette of colors with an enhanced range of hue and saturation, allowing natural shades and precise details to be seen, even in dark scenes.

XR Motion Clarity™

On some screens, fast-moving scenes can seem to go by in a blur. Our latest LED XR X-Motion Clarity technology keeps everything smooth, bright and clear. Each frame is individually controlled and its duration optimized, while brightness is boosted when needed, so you won't miss a thing.

XR 4K Upscaling

Powered by our Cognitive Processor XR, this display takes 2K signals close to true 4K quality for incredibly real and immersive viewing. XR 4K Upscaling accesses and utilizes a vast amount of data, analyzing patterns in scenes and recreating subtle details

XR Contrast Booster

By precisely balancing light output across the screen, dimming some areas and boosting others, the XR Contrast Booster adjusts brightness for higher peaks in glare and deeper blacks in shadows. As bright areas are brighter and dark areas darker, scenes look more real with extra depth and detail.

24/7·Portrait·Tilt

Full Array LED

Brighter highlights and deeper blacks

Multiple LED zoning allows Full Array display models to adjust and create contrast depending on the scene, resulting in more light where brightness is needed, and less light where darkness is needed.

Cosmetic Design

Flat bottom bezel

24/7·Portrait·Tilt

Motionflow XR

Less blur, even in fast scenes

On some screens, sports and fast action scenes go by in a blur. Our Motionflow technology keeps movement smooth and clear by creating extra images between images and black images between scenes. The result? Less blur and afterimage, more flowing motion.

Options & Accessories

BRAVIA Meeting (WQ-BM1)

BRAVIA Meeting enables centralized management of displays and interactive meetings via a network. The optional software, BRAVIA Meeting, enables remote monitoring of multiple displays, power control, and configuration changes. In addition, displaying PC screen shots wirelessly and annotation which enhances in-meeting collaboration.

BRAVIA Signage (WQ-BS1)

BRAVIA Signage simplifies management and distribution of signage content across multiple networked BRAVIA displays. Group displays, schedule content playout and more – everything's included with this highly flexible package.

BRAVIA Signage Free (WQF-BS1F)

BRAVIA Signage Free is an easy-to-use standalone signage player application, allowing you to display video, photos and HTML5 content directly from a connected USB flash memory.

It's quick and intuitive to set up screens, edit and preview playlists and schedules using the BRAVIA display's remote controller.

FWA-CE100

Full HD USB Camera & Microphone exclusively designed for BRAVIA 4K Professional Displays.

STP-IR200 Series

Touch overlay kit for 55", 65", 75" BRAVIA 4K Professional Displays.
